

Past-Life Regression Heals a Child's Issue!! TESTIMONIAL

Here is the story of how one family received healing and profound changes in their lives resulting from a past-life regression healing session (group regression led by my teacher, Connie Hart):

“I participated in a past-life regression healing session that changed my and my daughter’s life!! My 3-year-old daughter was scared of the water her whole life, so baths were basically torture for everyone involved.

“During previous past life visions on my own, I had seen my daughter in a lake drowning, but I wasn’t able to save her. I didn’t know why I couldn’t save her and always felt guilty in this life.

*“When I went to the past-life regression session, I was able to view that day. I saw what led to her drowning, followed by my sadness throughout that lifetime. After I came back from the regression, I was told that I could go back into that lifetime I just saw and change something that I didn’t like. **This was my opportunity to rewrite our past!!***

*“In the next regression, I went back to that life and I knew exactly what was going to happen. **So, I was able to get to the lake before my daughter drowned and pull her out as she fell in!** I saw myself living the rest of that life happily.*

*“I went home that night with a full heart. Then, as I gave my daughter a bath, she didn’t cry. **Actually, she laughed while she splashed and played, which she had never done before that day!** I couldn’t believe what a change had happened, so I recorded it on video. I cried happy tears that night!*

*“The following night was the same, with my daughter being joyful in the bath! **To this day, she now loves the water.** Even if she is a little timid at times, she isn’t in tears when I wash her hair or terrified when water gets on her face.*

“I am forever grateful to this past-life healing process for helping my daughter and I to have that experience!”
